[Download Catalogue](#)

The controllers are housed in an ABS plastic enclosure with overall size of 70 mm (L) x 110 mm (B) x 105 mm (H). The enclosure consists of a base and Plug in Controller module, which facilitates easy replacement at sites.

Models for oil fired burners Controllers:

710 - PR - MA (equivalent to MA-81O Controllers) sensing by LDR.

712 - PR - 24 - PI4 (equivalent to LOA - 21 & LOA - 24 controllers)

For Gas fired burners Controllers:

722 - FR - P5, where the flame sensing is done by using Flame Rod.

732 - UV - P5, where flame sensing is by UV Sensor.

Burner Controllers	UV Sensor and Amplifiers	Flame Rod Amplifier	Burner / Sequence Controllers	Flame Sensors	Flame Amplifier	Ignition Transformer
